ABOUT

My role as a UXer centres around putting users at the core of product design, focusing on user experience as well as improving design practices and consistency. I concentrate on creating an appealing product that users want to engage with, through strong attention to detail, pushing boundaries with visuals and integrating modern frames of reference to convey the brand.

Through my experience, I have learnt the significance of user experience and user interface to guide the aesthetics of design, and the overall impact UX have on shaping a product.

I am passionate about user-centred design, and the impact it can have on people’s lives. Above all else, I want to make a difference in the world, a real, quantifiable impact.

Oh, and I also like to code.

EXPERIENCE

- Moneyfarm** - May 2022 to Present  
Lead Product Designer  
  
Moneyfarm is known as one of the most innovative fintechs headquartered in the heart of London. The mission is to provide investment solutions and advice to protect and grow client wealth through time.
  - Collaborating with and inspire product owners, engineers, marketing and the wider business, ensuring design helps drive the processes.
  - Leading design in my own strategic team using this position to oversee the end-to-end product experience across two other teams.
  - Developing design strategies based on both insight and intuition and taking these forward hands-on to create industry leading solutions. Alongside this, strengthening the design capability and help maintain design as strategic and key to Moneyfarm’s success.
  - Create and validate insight-informed design solutions to meet customer and business goals.
  - Delivering final UI design, concepts, flows and prototypes within an agile cross-functional environment
  - Lead Moneyfarm’s design system and processes.
  - Mentoring and managing two product designers, sharing my design know-how and help them grow.
  - Being the design facilitator and evangelist, building strong relationships in my team and beyond.
